PROFILE

Final-year B.Tech Computer Science and Engineering student with hands-on experience in backend and full-stack software development. Currently working as a Software Engineering Intern at India Health Link and exploring healthcare software workflows and backend systems. Strong foundation in Python, Java, JavaScript, SQL, DBMS, Operating Systems, and Computer Networks. Interested in Software Engineering, Backend Development, and technology-driven roles.

EXPERIENCE

- India Health Link** Remote Present
 - Software Engineering Intern*
 - HMIS Exploration:** Exploring Hospital Management Information System (HMIS) workflows and understanding healthcare modules, including OPD and EMR-related processes.
 - System Analysis:** Analyzing existing application workflows and identifying software requirements for backend services and database design.
 - Architecture Design:** Learning and preparing system architecture diagrams and database-level designs to support healthcare application development.
 - Team Collaboration:** Participating in team discussions and Scrum activities to understand requirements and assigned development tasks.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Backend Development: Node.js, Django, REST APIs, Authentication, CRUD Operations

Frontend Development: React.js, HTML, CSS

Databases: MySQL, MongoDB, Relational Database Design

Computer Science Fundamentals: DBMS, Operating Systems, Computer Networks

Tools & Platforms: Git, GitHub, VS Code, Postman

EDUCATION

K L E F University, Andhra Pradesh, India 2023 – 2027 (Expected)

Bachelor of Technology in Computer Science and Engineering (Honors)

CGPA: 8.86/10

PROJECTS

- Real-Time Polling Platform:** GitHub Node.js — React.js — WebSockets — MongoDB
 - Real-Time Communication:** Developed a real-time polling platform using WebSockets for live vote updates and synchronized results.
 - Backend Development:** Implemented backend services using Node.js and MongoDB for managing polling data and user interactions.
 - Data Validation:** Added input validation and vote-handling logic to maintain reliable data during concurrent user interactions.
- SmartDocGenerator:** GitHub Python — JavaScript — Full-Stack Development
 - Application Development:** Developed a full-stack platform for document generation and processing with frontend and backend components.
 - Authentication:** Implemented user authentication and access workflows for secure application usage.
 - Document Processing:** Developed document processing and analysis functionality with supporting user interface features.
- AI Image Colorization:** GitHub Python — Flask — PyTorch — DeOldify
 - AI Application:** Developed an AI-powered web application to transform black-and-white images into color using a pre-trained DeOldify model.
 - Model Integration:** Integrated Python machine learning libraries and the DeOldify model for image colorization processing.
 - Backend Development:** Built a Flask backend for image uploads, model processing, temporary file handling, and result generation.

CERTIFICATIONS

- Salesforce Certified Developer:** Salesforce application development and CRM platform concepts.
- Oracle Certified Associate – Database:** SQL programming, relational database concepts, and database fundamentals.
- Automation Anywhere RPA Professional:** Robotic process automation using the Automation 360 platform.
- Linguaskill English B2 – Cambridge English:** B2-level English language proficiency certification.
